19 Custom Crafted

20 Doors and Finishes

**STELLAR CABINETRY** is a division of Meyer Brothers and Sons, a family owned and operated design | build | remodel firm established in 1978. In the beginning, brothers Dick, Joe and Jerry were master carpenters, building and finishing cabinetry in the garages of the homes to be installed in. Over the years, family members and employees were added and services diversified, and the brothers' love and passion for custom crafted cabinetry continued to grow.

**OUR BEGINNING**

Stellar Cabinetry was created by Rick & Joey Meyer, second generation sons, on the foundation built by their fathers. Rick, an architect, and Joey, a master carpenter, brought a new set of skills, innovation and passion to the firm. In response to a growing demand for competitively priced, quality designed and crafted cabinetry, they developed not only a new cabinetry line, but a new way to think about the process. For several years they researched and developed relationships with other professionals and have met that demand through the use of technology and the implementation of greater efficiencies in both the design and construction processes.

**OUR PROCESS**

Stellar Cabinetry is available two ways. For clients outside of Cincinnati, we offer flat packed, ready to assemble cabinetry shipped anywhere in the US, containing all elements for a complete cabinetry package. This requires assembly by a skilled homeowner or local carpenter. For clients in the Cincinnati area, we offer fully assembled cabinets delivered to your home. In addition, we offer installation of your custom cabinetry as well as full remodeling services through Meyer Brothers and Sons. Please visit our website for additional information: [www.stellarcabinetry.com](http://www.stellarcabinetry.com)

**ARCHITECTURALLY INSPIRED**

Each Stellar project is uniquely yours: a collaboration between you and our team of architect/designers. With no limits to design based on typical cabinetry standards, we are able to create a project that fits your specific design sense and home style. Our professional staff of architect/designers can take initial concepts and turn them into thoughtful and artistic solutions.

**CUSTOM CRAFTED**

Each Stellar project is expertly crafted from scratch for you. We have no stock items sitting in a warehouse waiting to be sold. Stellar cabinets feature an award winning, innovative interlocking system for face-framed cabinet boxes: high quality, precision-made, all-American Hardwood, formaldehyde-free furniture grade plywood, all wood construction combining old world craftsmanship with modern innovation.

**AMERICAN MADE**

From the woods to your walls, all Stellar Cabinetry materials and manufacturing are done in the heart of the USA. And due to our small business organizational structure, this path from the woods to your walls is much shorter than our competitors, as is our customer service communication path. This allows you access to the most affordable custom cabinetry and most accessible customer service on the market.

- Painted Hard Maple
- Full-Overlay Cope and Stick Door

- Stained Cherry
- 1/2" Overlay Slab Door Style

“Working with the architect, Rick was awesome. He was very attentive to what I was asking, suggesting even better things that I had not thought of. They custom designed my kitchen cabinets amongst other work in my bathroom and living room. The custom vanity in my bathroom was more than I expected

and very useful. I had them design & build an entertainment unit for my living room. It was designed for exactly what I needed for my tv & components and the craftsmanship and the finish were of the highest quality that I have seen.”

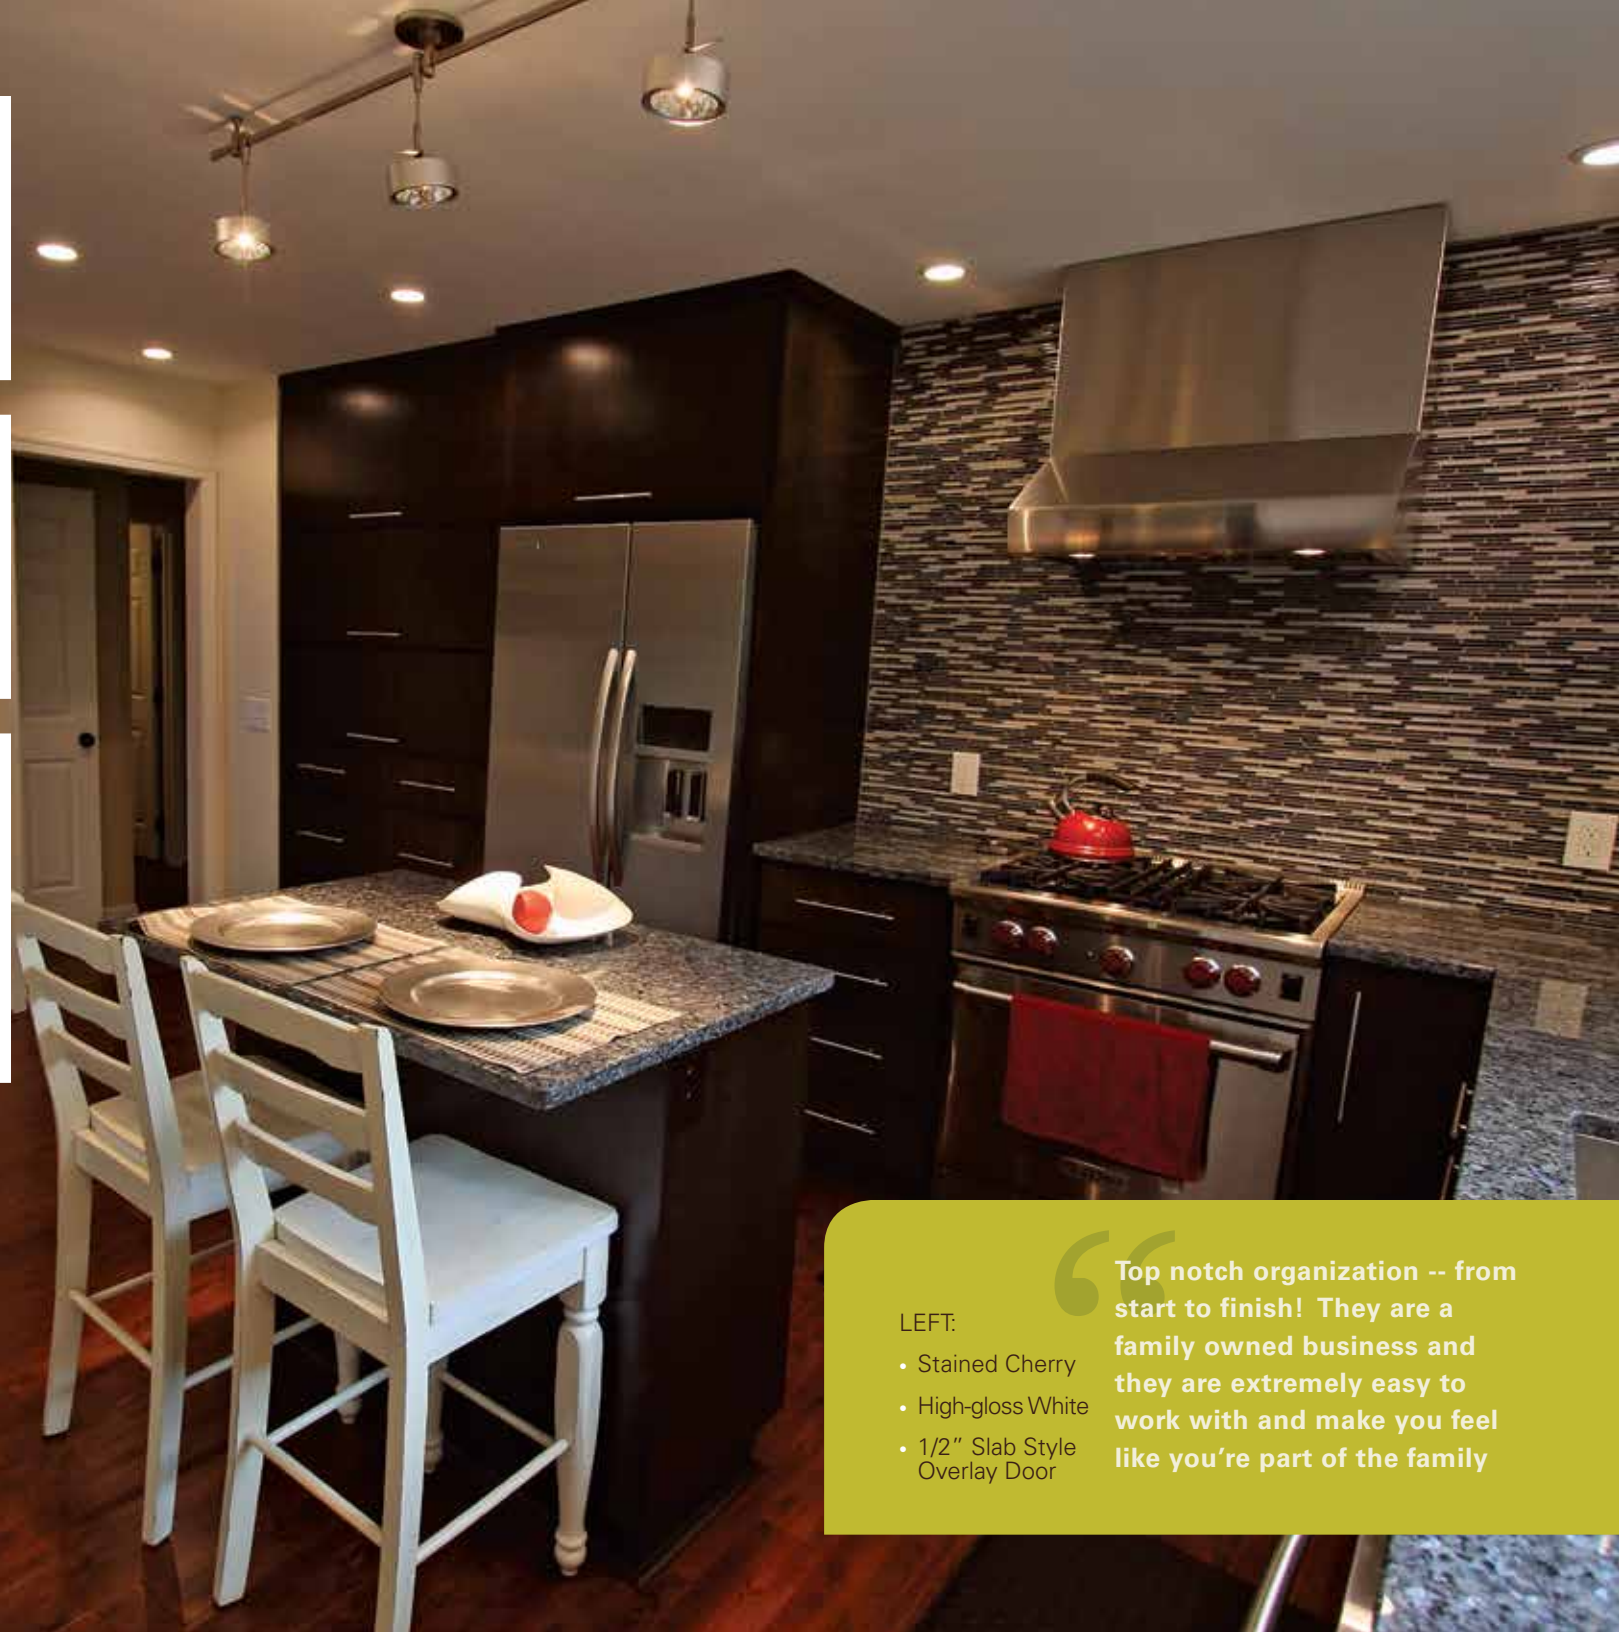

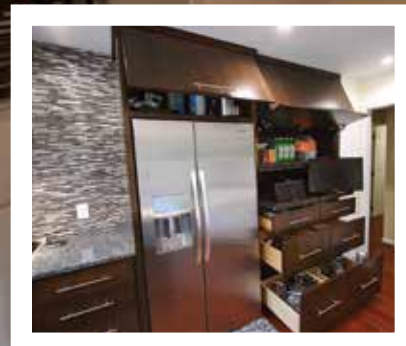

— FELICIA

“It went GREAT! To begin with their architect came out and sat down with us for about two hours discussing what we wanted. Sent us by email an estimate and preliminary design. We decided to move forward. He came back out and went through everything in great detail. He measured and checked walls to see exactly how to open up our space. Beautiful, functional custom cabinetry with pull out drawers, hidden spice racks, lazy susan organizer and cookie sheet organizers. My new kitchen is awesome.”

— KATHY

- Natural Rustic Cherry
- Painted Cherry with Hand Rubbed Through Finish
- Inset Cope and Stick Door

#### LEFT:

- Stained Cherry
- High-gloss White
- 1/2" Slab Style Overlay Door

**Top notch organization -- from start to finish! They are a family owned business and they are extremely easy to work with and make you feel like you're part of the family**

#### RIGHT:

- Stained Cherry
- Painted Cherry with hand rubbed through finish
- 1/2" overlay mitered door with rope inlay

**as well. They got their start in carpentry and wood working and it shows. Their ability to make cabinets and fine trim is absolutely amazing. They were able to work with us right from the start. We didn't know exactly what we wanted but their architect was able to work with us and change the drawings several times as we changed our minds. You absolutely cannot go wrong by employing their services. They are a wonderful group of folks and their work is outstanding!! - NATE**

Hired Stellar to remodel our kitchen.. with their awesome design ideas, we were able to open up the kitchen by removing the wall between the kitchen and dining room in the process. They custom made all their cabinetry and then matched a unique color finish we wanted to an exact match without charging us an outrageous upgrade charge. They are beautiful and with the granite counter tops and new pin wheel design on the tile floors the entire area has been transformed. Their goal is to please and they certainly do it.

— DAVE

- Natural Select Cherry
- Painted Cherry with Hand Rubbed Through Finish
- Full Overlay Mitered Door with Rope Inlay

## custom islands

Custom islands can feature complimentary or matching finishes to the rest of the kitchen. Islands are often added to increase work surfaces, improve kitchen functionality and accommodate seating, allowing family and friends to enter into your cooking experience.

## custom hoods

Custom hoods are often used as the feature element in a kitchen. They can be designed and finished to make a statement or serve to accentuate the style of your kitchen. Either way they serve great function by providing housing for a well ventilating hood system.

bathroom

“Thank you for all the design work and finish work that made our home work for us. Working with you is pure pleasure. Each of you has a vision, and how to accomplish that vision. Each of you has craftsmanship as your middle name.”

– ELLEN

- Painted Maple
- Inset Cope and Stick Door

## custom built-ins

The customization of built-in cabinetry in your home is limited only to your imagination. Whether it's an entertainment unit in your family room or a display cabinet to house your art collection, our architect/designer can bring your project to life.
